

INDOOR NAVIGATION FOR EXHIBITIONS AND TRADE SHOWS

Every attendee finds every stand.

Mapii puts your venue map, exhibitor list and walking directions on attendees' phones. They enter your event code and they're on the map, with no paper floor plans and fewer queues at the information desk.

How it works for your attendees

1 Enter your code

Print it on badges, tickets or signage. Codes ignore case and spacing, so they're easy to type.

2 See the whole venue

Every exhibitor and facility is labelled on an interactive indoor map. Tap any stand for details.

3 Search the way they talk

Exhibitor names, categories or everyday words: "coffee" finds the cafe and "wc" finds the toilets.

4 Walk straight there

A walking route with a time estimate. With location on, the route follows them and says when they've arrived.

Screens show a demo event on a sample venue map.

What you get as an organiser

Footfall for every exhibitor

Attendees can find stands at the back of the hall as easily as the ones by the entrance.

Fewer "where is...?" questions

Toilets, cafes, first aid and the main stage are a search away, so staff can focus on everything else.

We do the mapping

Send your floor plan and exhibitor list. We map the venue, place every stand and give you an event code.

Late changes go live instantly

New exhibitors and moved stands update on attendees' phones without a new app release.

Built for busy venue Wi-Fi

Exhibitor details are saved on the phone, so labels and search keep working when the signal drops.

Accessible and private

Screen-reader labels, large touch targets and reduced motion. Location stays on the attendee's phone.

Coming next

- An organiser dashboard for exhibitors, stands and event codes
- Insights on the most-searched exhibitors and busiest routes
- Your event schedule, with directions to every session

See Mapii on your venue

Book a 15-minute demo. We'll show Mapii running on a sample event and talk through mapping your venue.
